## Target Details

Target:	Asparagine Synthetase (ASNS)
Alternative Name:	Asns,ts11 ( <a href="#">ASNS Products</a> )
Background:	The protein encoded by this gene is involved in the synthesis of asparagine. This gene complements a mutation in the temperature-sensitive hamster mutant ts11, which blocks progression through the G1 phase of the cell cycle at nonpermissive temperature. Alternatively spliced transcript variants have been described for this gene.
