Datasheet for ABIN2715002 Aspartate beta Hydroxylase Protein (Transcript Variant 11) (Myc-DYKDDDDK Tag)

Image

Overview

Quantity:	20 µg
Target:	Aspartate beta Hydroxylase (ASPH)
Protein Characteristics:	Transcript Variant 11
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This Aspartate beta Hydroxylase protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human ASPH (transcript variant 11) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	Aspartate beta Hydroxylase (ASPH)
Alternative Name:	Asph (ASPH Products)
Background:	This gene is thought to play an important role in calcium homeostasis. The gene is expressed
	from two promoters and undergoes extensive alternative splicing. The encoded set of proteins
	share varying amounts of overlap near their N-termini but have substantial variations in their C-
	terminal domains resulting in distinct functional properties. The longest isoforms (a and f)

	include a C-terminal Aspartyl/Asparaginyl beta-hydroxylase domain that hydroxylates aspartic
	acid or asparagine residues in the epidermal growth factor (EGF)-like domains of some
	proteins, including protein C, coagulation factors VII, IX, and X, and the complement factors C1R
	and C1S. Other isoforms differ primarily in the C-terminal sequence and lack the hydroxylase
	domain, and some have been localized to the endoplasmic and sarcoplasmic reticulum. Some
	of these isoforms are found in complexes with calsequestrin, triadin, and the ryanodine
	receptor, and have been shown to regulate calcium release from the sarcoplasmic reticulum.
	Some isoforms have been implicated in metastasis.
Molecular Weight:	29.6 kDa
NCBI Accession:	NP_001158227
Pathways:	Positive Regulation of Endopeptidase Activity
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
