BRAF Protein (DYKDDDDK Tag)

Images

\sim				
	$ V \cap$	r\/I	19	٨

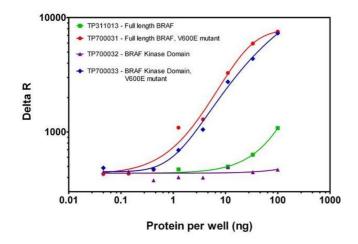

Quantity:	20 μg
Target:	BRAF
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Biological Activity:	Active
Purification tag / Conjugate:	This BRAF protein is labelled with DYKDDDDK Tag.
Application:	Antibody Production (AbP), Functional Studies (Func), Standard (STD), Protein Interaction (PI)
Product Details	
Specificity:	Optimal preservation of protein structure, post-translational modifications and functions.
Specificity: Characteristics:	Optimal preservation of protein structure, post-translational modifications and functions. Recombinant human B-Raf proto-oncogene protein expressed in HEK293 cells. Produced with end-sequenced ORF clone Tested for bioactivity.
	 Recombinant human B-Raf proto-oncogene protein expressed in HEK293 cells. Produced with end-sequenced ORF clone

Target Details

Target:	BRAF	
Alternative Name:	B-Raf Proto-Oncogene (BRAF Products)	
Background:	This gene encodes a protein belonging to the raf/mil family of serine/threonine protein kinases	
	This protein plays a role in regulating the MAP kinase/ERKs signaling pathway, which affects	
	cell division, differentiation, and secretion. Mutations in this gene are associated with	
	cardiofaciocutaneous syndrome, a disease characterized by heart defects, mental retardation	
	and a distinctive facial appearance. Mutations in this gene have also been associated with	
	various cancers, including non-Hodgkin lymphoma, colorectal cancer, malignant melanoma,	
	thyroid carcinoma, non-small cell lung carcinoma, and adenocarcinoma of lung. A pseudogene	
	which is located on chromosome X, has been identified for this gene.	
Molecular Weight:	44 kDa	
NCBI Accession:	NP_004324	
Pathways:	MAPK Signaling, RTK Signaling, Neurotrophin Signaling Pathway, Ribonucleoprotein Complex	
	Subunit Organization, Hepatitis C, Autophagy	
Application Details		
Application Notes:	Recombinant human proteins can be used for:	
	Native antigens for optimized antibody production	
	Positive controls in ELISA and other antibody assays	
	Protein-protein interaction	
	In vitro biochemical assays and cell-based functional assays	
Comment:	The tag is located at the C-terminal.	
Restrictions:	For Research Use only	
Handling		
Concentration:	> 50 μg/mL	
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol. Store at -80C. Avoid repeated freeze-	
	thaw cycles. Stable for at least 3 months from receipt of products under proper storage and	
	handling conditions.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze	

immediately. Only 2-3 freeze thaw cycles are recommended.
