Overview	
Quantity:	20 μg
Target:	BAIAP2
Origin:	Human
Source:	Insect cells (Sf9)
Protein Type:	Recombinant
Purification tag / Conjugate:	This BAIAP2 protein is labelled with DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human BAIAP2 (full length, C-term DDK tag, transcript variant 1) protein expressed in sf9 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	BAIAP2
Alternative Name:	Baiap2 (BAIAP2 Products)
Background:	The protein encoded by this gene has been identified as a brain-specific angiogenesis inhibitor (BAI1)-binding protein. This adaptor protein links membrane bound G-proteins to cytoplasmic effector proteins. This protein functions as an insulin receptor tyrosine kinase substrate and

suggests a role for insulin in the central nervous system. It also associates with a downstream

Target Details

effector of Rho small G proteins, which is associated with the formation of stress fibers and
cytokinesis. This protein is involved in lamellipodia and filopodia formation in motile cells and
may affect neuronal growth-cone guidance. This protein has also been identified as interacting
with the dentatorubral-pallidoluysian atrophy gene, which is associated with an autosomal
dominant neurodegenerative disease. Alternative splicing results in multiple transcript variants
encoding distinct isoforms.[provided by RefSeq, Jan 2009]

Molecular Weight:

57.2 kDa

NCBI Accession:

NP_059344

Application Details

Recombinant human proteins can be used for:

Native antigens for optimized antibody production

Positive controls in ELISA and other antibody assays

Comment:

The tag is located at the C-terminal.

Restrictions:

For Research Use only

Handling

Concentration:	50 μg/mL
Buffer:	50 mM Tris-HCl, pH 8.0, 100 mM glycine, 10 % glycerol. Store at -80C. Avoid repeated freeze-thaw cycles. Stable for at least 3 months from receipt of products under proper storage and handling conditions.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze

immediately. Only 2-3 freeze thaw cycles are recommended.
