## Bestrophin 1 Protein (BEST1) (Transcript Variant 1) (Myc-DYKDDDK Tag)

Go to Product pag

Overview	
Quantity:	20 μg
Target:	Bestrophin 1 (BEST1)
Protein Characteristics:	Transcript Variant 1
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This Bestrophin 1 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	<ul> <li>Recombinant human Bestrophin-1 (transcript variant 1) protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul>
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	Bestrophin 1 (BEST1)
Alternative Name:	Bestrophin-1 (BEST1 Products)
Background:	This gene encodes a member of the bestrophin gene family. This small gene family is characterized by proteins with a highly conserved N-terminus with four to six transmembrane domains. Bestrophins may form chloride ion channels or may regulate voltage-gated L-type calcium-ion channels. Bestrophins are generally believed to form calcium-activated chloride-ion

### **Target Details**

channels in epithelial cells but they have also been shown to be highly permeable to
bicarbonate ion transport in retinal tissue. Mutations in this gene are responsible for juvenile-
onset vitelliform macular dystrophy (VMD2), also known as Best macular dystrophy, in addition
to adult-onset vitelliform macular dystrophy (AVMD) and other retinopathies. Alternative
splicing results in multiple variants encoding distinct isoforms.[provided by RefSeq, Nov 2008].

Molecular Weight:

67.5 kDa

NCBI Accession:

NP\_004174

For Research Use only

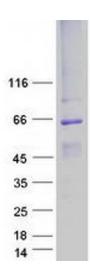

### **Application Details**

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.

### Handling

Restrictions:

Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.

### **Western Blotting**
