Target Details

Target:	C19orf21 (MISP)
Alternative Name:	c19orf21 (MISP Products)
Background:	The protein encoded by this gene is an actin-bundling protein involved in determining cell morphology and mitotic progression. The encoded protein is required for the proper positioning of the mitotic spindle. Two transcript variants, one protein-coding and the other non-protein coding, have been found for this gene.
Molecular Weight:	75.2 kDa
