Overview	
Quantity:	20 μg
Target:	DGKA
Protein Characteristics:	Transcript Variant 3
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This DGKA protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	Recombinant human DAG kinase alpha (transcript variant 3) protein expressed in HEK293
	cells. • Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	DGKA
Alternative Name:	Dag Kinase alpha (DGKA Products)
Background:	The protein encoded by this gene belongs to the eukaryotic diacylglycerol kinase family. It acts
	as a modulator that competes with protein kinase C for the second messenger diacylglycerol in
	intracellular signaling pathways. It also plays an important role in the resynthesis of

Target Details

	phosphatidylinositols and phosphorylating diacylglycerol to phosphatidic acid. Alternative
	splicing occurs at this locus and four transcript variants encoding the same protein have been
	identified.
Molecular Weight:	82.5 kDa
NCBI Accession:	NP_001336

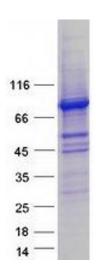

Application Details

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

Handling

Concentration:	50 μg/mL	
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.
