Datasheet for ABIN2715554
YWHAE Protein (Transcript Variant 1) (His tag)
1 Image

Overview

| Quantity: | $10 \mu \mathrm{~g}$ |
| :--- | :--- |
| Target: | YWHAE |
| Protein Characteristics: | Transcript Variant 1 |
| Origin: | Human |
| Source: | Escherichia coli (E. coli) |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This YWHAE protein is labelled with His tag. |
| Application: | Antibody Production (AbP), Standard (STD) |

Product Details

| Characteristics: | - Recombinant human 14-3-3 protein epsilon (transcript variant 1) protein expressed in E. coli. |
| :--- | :--- |
|  | - Produced with end-sequenced ORF clone |
| Purity: | $>95 \%$ as determined by SDS-PAGE and Coomassie blue staining |
| Endotoxin Level: | $<0.1$ EU per $\mu \mathrm{g}$ protein as determined by LAL test |

## Target Details

| Target: | YWHAE |
| :--- | :--- |
| Alternative Name: | $14-3-3$ Protein epsilon (YWHAE Products) |
| Background: | This gene product belongs to the 14-3-3 family of proteins which mediate signal transduction |
|  | by binding to phosphoserine-containing proteins. This highly conserved protein family is found |

|  | in both plants and mammals, and this protein is $100 \%$ identical to the mouse ortholog. It |
| :--- | :--- |
| interacts with CDC25 phosphatases, RAF1 and IRS1 proteins, suggesting its role in diverse |  |
| biochemical activities related to signal transduction, such as cell division and regulation of |  |
| insulin sensitivity. It has also been implicated in the pathogenesis of small cell lung cancer. Two |  |
| transcript variants, one protein-coding and the other non-protein-coding, have been found for |  |
| this gene. |  |$\quad$| Molecular Weight: | 56 kDa |
| :--- | :--- |
| NCBI Accession: | NP_006752 |
| Pathways: | Neurotrophin Signaling Pathway, Myometrial Relaxation and Contraction, M Phase |

## Application Details

| Application Notes: | Recombinant human proteins can be used for: |
| :--- | :--- |
|  | Native antigens for optimized antibody production |
| Positive controls in ELISA and other antibody assays |  |

Buffer:
Lyophilized from a $0.2 \mu \mathrm{M}$ filtered solution of 20 mM Phosphate buffer, $150 \mathrm{mM} \mathrm{NaCl}, \mathrm{pH} 7.2$. Stable for at least 6 months from date of receipt under proper storage and handling conditions.

| Storage: | $-80^{\circ} \mathrm{C}$ |
| :--- | :--- |
| Storage Comment: | Store at $-80^{\circ} \mathrm{C}$. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze |
| immediately. Only 2-3 freeze thaw cycles are recommended. |  |

## Western Blotting
