Datasheet for ABIN2718545 CSH1 Protein (Transcript Variant 3) (Myc-DYKDDDDK Tag)

Overview

Image

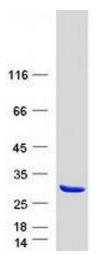

| Overview | |
|-------------------------------|---|
| Quantity: | 20 µg |
| Target: | CSH1 |
| Protein Characteristics: | Transcript Variant 3 |
| Origin: | Human |
| Source: | HEK-293 Cells |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This CSH1 protein is labelled with Myc-DYKDDDDK Tag. |
| Application: | Antibody Production (AbP), Standard (STD) |
| Product Details | |
| Characteristics: | Recombinant human Chorionic somatomammotropin hormone 2 (CSH2), transcript variant 3 (transcript variant 3) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone |
| Purity: | > 80 % as determined by SDS-PAGE and Coomassie blue staining |
| Target Details | |
| Target: | CSH1 |
| Alternative Name: | Chorionic Somatomammotropin Hormone 2 (Csh2) (CSH1 Products) |
| Background: | The protein encoded by this gene is a member of the somatotropin/prolactin family of |

hormones and plays an important role in growth control. The gene is located at the growth

hormone locus on chromosome 17 along with four other related genes in the same

| | transcriptional orientation an arrangement which is thought to have evolved by a series of gene |
|---------------------|--|
| | duplications. Although the five genes share a remarkably high degree of sequence identity, they |
| | are expressed selectively in different tissues. Alternative splicing generates additional isoforms |
| | of each of the five growth hormones. This particular family member is expressed mainly in the |
| | placenta and utilizes multiple transcription initiation sites. Expression of the identical mature |
| | proteins for chorionic somatomammotropin hormones 1 and 2 is upregulated during |
| | development, while the ratio of 1 to 2 increases by term. Structural and expression differences |
| | provide avenues for developmental regulation and tissue specificity. |
| Molecular Weight: | 13.7 kDa |
| NCBI Accession: | NP_072171 |
| Pathways: | Response to Growth Hormone Stimulus |
| Application Details | |
| Application Notes: | Recombinant human proteins can be used for: |
| | Native antigens for optimized antibody production |
| | Positive controls in ELISA and other antibody assays |
| Comment: | The tag is located at the C-terminal. |
| Restrictions: | For Research Use only |
| Handling | |
| Concentration: | 50 μg/mL |
| Buffer: | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol. |
| Storage: | -80 °C |
| Storage Comment: | Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze |
| | |
