Datasheet for ABIN2719214
DAP3 Protein (Transcript Variant 1) (Myc-DYKDDDDK Tag)
1 Image

## Overview

| Quantity: | $20 \mu \mathrm{~g}$ |
| :--- | :--- |
| Target: | DAP3 |
| Protein Characteristics: | Transcript Variant 1 |
| Origin: | Human |
| Source: | HEK-293 Cells |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This DAP3 protein is labelled with Myc-DYKDDDDK Tag. |
| Application: | Antibody Production (AbP), Standard (STD) |

## Product Details

## Characteristics:

- Recombinant human DAP3 / MRPS29 (transcript variant 1) protein expressed in HEK293 cells.
- Produced with end-sequenced ORF clone

Purity: $\quad>80 \%$ as determined by SDS-PAGE and Coomassie blue staining

Target Details

| Target: | DAP3 |
| :--- | :--- |
| Alternative Name: | Dap3,mrps29 (DAP3 Products) |
| Background: | Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein <br> synthesis within the mitochondrion. Mitochondrial ribosomes (mitoribosomes) consist of a <br> small 28S subunit and a large 39S subunit. They have an estimated $75 \%$ protein to rRNA |

|  | composition compared to prokaryotic ribosomes, where this ratio is reversed. Another difference between mammalian mitoribosomes and prokaryotic ribosomes is that the latter contain a 5 S rRNA. Among different species, the proteins comprising the mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which prevents easy recognition by sequence homology. This gene encodes a 28 S subunit protein that also participates in apoptotic pathways which are initiated by tumor necrosis factor-alpha, Fas ligand, and gamma interferon. This protein potentially binds ATP/GTP and might be a functional partner of the mitoribosomal protein S27. Multiple alternatively spliced transcript variants encoding distinct isoforms have been found for this gene. Pseudogenes corresponding to this gene are found on chromosomes 1q and 2q. |
| :---: | :---: |
| Molecular Weight: | 45.4 kDa |
| NCBI Accession: | NP_387506 |
| Application Details |  |
| Application Notes: | Recombinant human proteins can be used for: <br> Native antigens for optimized antibody production <br> Positive controls in ELISA and other antibody assays |
| Comment: | The tag is located at the C-terminal. |
| Restrictions: | For Research Use only |
| Handling |  |
| Concentration: | $50 \mathrm{mg} / \mathrm{mL}$ |
| Buffer: | 25 mM Tris. $\mathrm{HCl}, \mathrm{pH} 7.3,100 \mathrm{mM}$ glycine, $10 \%$ glycerol. |
| Storage: | $-80^{\circ} \mathrm{C}$ |
| Storage Comment: | Store at $-80^{\circ} \mathrm{C}$. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended. |

Western Blotting
