Target Details

Target:	DEFB125
Abstract:	DEFB125 Products
Background:	Defensins are cysteine-rich cationic polypeptides that are important in the host immunologic response to invading microorganisms. The antimicrobial protein encoded by this gene is secreted and is a member of the beta defensin protein family. Beta defensin genes are found in several clusters throughout the genome, with this gene mapping to a cluster at 20p13.
Molecular Weight:	15.3 kDa
