Target Details

Target:	Dermatopontin (DPT)
Alternative Name:	Dermatopontin (DPT Products)
Background:	Dermatopontin is an extracellular matrix protein with possible functions in cell-matrix interactions and matrix assembly. The protein is found in various tissues and many of its tyrosine residues are sulphated. Dermatopontin is postulated to modify the behavior of TGF-beta through interaction with decorin.
Molecular Weight:	21.9 kDa
