## **DHRS9 Protein (Transcript Variant 3) (Myc-DYKDDDDK Tag)**

**Image** 

Go to Product page

| Overview                      |   |
|-------------------------------|---|
| Quantity:                     | 20 μg   |
| Target:                       | DHRS9   |
| Protein Characteristics:      | Transcript Variant 3  |
| Origin:                       | Human   |
| Source:                       | HEK-293 Cells   |
| Protein Type:                 | Recombinant   |
| Purification tag / Conjugate: | This DHRS9 protein is labelled with Myc-DYKDDDDK Tag.   |
| Application:                  | Antibody Production (AbP), Standard (STD)   |
| Product Details               |   |
| Characteristics:              | <ul> <li>Recombinant human DHRS9 (transcript variant 3) protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul>                                    |
| Purity:                       | > 80 % as determined by SDS-PAGE and Coomassie blue staining  |
| Target Details                |   |
| Target:                       | DHRS9   |
| Alternative Name:             | Dhrs9 (DHRS9 Products)  |
| Background:                   | This gene encodes a member of the short-chain dehydrogenases/reductases (SDR) family. The encoded protein has been identified as a moonlighting protein based on its ability to perform |

hydroxysteroids and is able to convert 3-alpha-tetrahydroprogesterone to

mechanistically distinct functions. This protein demonstrates oxidoreductase activity toward

#### **Target Details**

|                   | dihydroxyprogesterone and 3-alpha-androstanediol to dihydroxyprogesterone in the cytoplasm, and may additionally function as a transcriptional repressor in the nucleus. Alternative splicing |
|-------------------|---|
|                   |   |
|                   | results in multiple transcript variants.  |
| Molecular Weight: | 35 kDa  |
| NCBI Accession:   | NP_001135742  |
| Pathways:         | C21-Steroid Hormone Metabolic Process   |

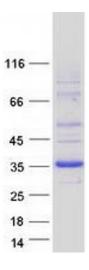

### **Application Details**

| Application Notes: | Recombinant human proteins can be used for:          |
|--------------------|--|
|                    | Native antigens for optimized antibody production    |
|                    | Positive controls in ELISA and other antibody assays |
| Comment:           | The tag is located at the C-terminal.                |
| Restrictions:      | For Research Use only                                |

#### Handling

| Concentration:   | 50 μg/mL  |
|------------------|---|
| Buffer:          | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.  |
| Storage:         | -80 °C  |
| Storage Comment: | Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended. |
