## Target Details

Target:	PARK7/DJ1 (PARK7)
Alternative Name:	Dj-1,park7 ( <a href="#">PARK7 Products</a> )
Background:	The product of this gene belongs to the peptidase C56 family of proteins. It acts as a positive regulator of androgen receptor-dependent transcription. It may also function as a redox-sensitive chaperone, as a sensor for oxidative stress, and it apparently protects neurons against oxidative stress and cell death. Defects in this gene are the cause of autosomal recessive early-
