| Target:                       | DLX4                                                                                                                                                                                                                                                                                                                                                                          |
| Alternative Name:             | Dlx4,bp1 (DLX4 Products)                                                                                                                                                                                                                                                                                                                                                      |
| Background:                   | Many vertebrate homeo box-containing genes have been identified on the basis of their sequence similarity with Drosophila developmental genes. Members of the Dlx gene family contain a homeobox that is related to that of Distal-less (Dll), a gene expressed in the head and limbs of the developing fruit fly. The Distal-less (Dlx) family of genes comprises at least 6 |

## Target Details

|                     | different members, DLX1-DLX6. The DLX proteins are postulated to play a role in forebrain and<br>craniofacial development. Three transcript variants have been described for this gene, however,<br>the full length nature of one variant has not been described. Studies of the two splice variants<br>revealed that one encoded isoform functions as a repressor of the beta-globin gene while the<br>other isoform lacks that function. |

| Handling            |                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Concentration:      | 50 μg/mL                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Buffer:             | 25 mM Tris, pH 8.0, 150 mM NaCl, 10 % glycerol, 1 % Sarkosyl. Store at -80C. Avoid repeated freeze-thaw cycles. Stable for at least 3 months from receipt of products under proper storage and handling conditions.                                                                                                                                                                                                                        |
| Storage:            | -80 °C                                                                                                                                                                                                                                                                                                                                                                                                                                     |

Storage Comment:Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freezeimmediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
