| Overview                      |                                                                                                                                                         |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| Quantity:                     | 20 μg                                                                                                                                                   |
| Target:                       | DNASEX                                                                                                                                                  |
| Protein Characteristics:      | Transcript Variant 4                                                                                                                                    |
| Origin:                       | Human                                                                                                                                                   |
| Source:                       | HEK-293 Cells                                                                                                                                           |
| Protein Type:                 | Recombinant                                                                                                                                             |
| Purification tag / Conjugate: | This DNASEX protein is labelled with Myc-DYKDDDDK Tag.                                                                                                  |
| Application:                  | Antibody Production (AbP), Standard (STD)                                                                                                               |
| Product Details               |                                                                                                                                                         |
| Characteristics:              | <ul> <li>Recombinant human DNASE1L1 (transcript variant 4) protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul> |
| Purity:                       | > 80 % as determined by SDS-PAGE and Coomassie blue staining                                                                                            |
| Target Details                |                                                                                                                                                         |
| Target:                       | DNASEX                                                                                                                                                  |
| Alternative Name:             | Dnase1I1 (DNASEX Products)                                                                                                                              |
| Background:                   | This gene encodes a deoxyribonuclease protein that shows high sequence similarity to DNase                                                              |
|                               | I. The encoded protein is localized to the endoplasmic reticulum and modified by N-linked                                                               |
|                               | glycosylation. Alternate transcriptional splice variants encoding the same protein have been                                                            |
|                               | observed.                                                                                                                                               |
|                               |                                                                                                                                                         |

#### **Target Details**

| Molecular Weight:   | 31.9 kDa     |
|---------------------|--------------|
| NCBI Accession:     | NP_001009934 |
| Application Details |              |

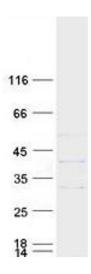

#### Application Details

| Application Notes: | Recombinant human proteins can be used for:          |
|--------------------|------------------------------------------------------|
|                    | Native antigens for optimized antibody production    |
|                    | Positive controls in ELISA and other antibody assays |
| Comment:           | The tag is located at the C-terminal.                |
| Restrictions:      | For Research Use only                                |

### Handling

| Concentration:   | 50 μg/mL                                                                                                                                          |  |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Buffer:          | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.                                                                                            |  |
| Storage:         | -80 °C                                                                                                                                            |  |
| Storage Comment: | Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended. |  |
