## **ENO3 Protein (Transcript Variant 2) (Myc-DYKDDDDK Tag)**

Image

U	V	е	۲V	/	е	V	V

Overview	
Quantity:	20 μg
Target:	ENO3
Protein Characteristics:	Transcript Variant 2
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This ENO3 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	<ul> <li>Recombinant human Enolase beta (transcript variant 2) protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul>
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	EN03
Alternative Name:	Enolase beta (ENO3 Products)
Background:	This gene encodes one of the three enclase isoenzymes found in mammals. This isoenzyme is
	found in skeletal muscle cells in the adult where it may play a role in muscle development and
	regeneration. A switch from alpha enolase to beta enolase occurs in muscle tissue during
	development in rodents. Mutations in this gene have be associated glycogen storage disease.

#### **Target Details**

	Alternatively spliced transcript variants encoding different isoforms have been described.[provided by RefSeq, Jul 2010].
Molecular Weight:	46.8 kDa
NCBI Accession:	NP_443739

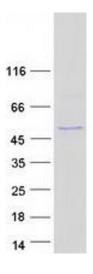

### **Application Details**

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

### Handling

Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.
