EPSTI1 Protein (Transcript Variant 1) (Myc-DYKDDDDK Tag)

Image

Go to Product page

Overview	
Quantity:	20 μg
Target:	EPSTI1
Protein Characteristics:	Transcript Variant 1
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This EPSTI1 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human EPSTI1 (transcript variant 1) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	

Target:	EPSTI1
Alternative Name:	Epsti1 (EPSTI1 Products)
Background:	The protein encoded by this gene has been shown to promote tumor invasion and metastasis in some invasive cancer cells when overexpressed. Expression of this gene has been shown to be upregulated by direct binding of the Kruppel like factor 8 protein to promoter sequences. The
	translated protein interacts with the amino terminal region of the valosin containing protein

Target Details

	gene product, resulting in the nuclear translocation of the nuclear factor kappa B subunit 1 gene
	product, and activation of target genes. Overexpression of this gene has been observed in
	some breast cancers and in some individuals with systemic lupus erythematosus (SLE).
Molecular Weight:	47.3 kDa
NCBI Accession:	NP_001002264

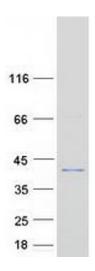

Application Details

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

Handling

Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.
