

Datasheet for ABIN2720372 ERBB3 Protein (Transcript Variant 1) (Myc-DYKDDDDK Tag)

Overview

Images

2

0000000	
Quantity:	20 µg
Target:	ERBB3
Protein Characteristics:	Transcript Variant 1
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This ERBB3 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human ERBB3 / HER3 (transcript variant 1) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	ERBB3
Alternative Name:	Erbb3,her3 (ERBB3 Products)
Background:	This gene encodes a member of the epidermal growth factor receptor (EGFR) family of receptor tyrosine kinases. This membrane-bound protein has a neuregulin binding domain but

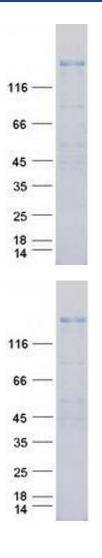

not an active kinase domain. It therefore can bind this ligand but not convey the signal into the

cell through protein phosphorylation. However, it does form heterodimers with other EGF

	receptor family members which do have kinase activity. Heterodimerization leads to the
	activation of pathways which lead to cell proliferation or differentiation. Amplification of this
	gene and/or overexpression of its protein have been reported in numerous cancers, including
	prostate, bladder, and breast tumors. Alternate transcriptional splice variants encoding different
	isoforms have been characterized. One isoform lacks the intermembrane region and is
	secreted outside the cell. This form acts to modulate the activity of the membrane-bound form.
	Additional splice variants have also been reported, but they have not been thoroughly
	characterized.
Molecular Weight:	146 kDa
NCBI Accession:	NP_001973
Pathways:	RTK Signaling, Fc-epsilon Receptor Signaling Pathway, EGFR Signaling Pathway, Neurotrophin
	Signaling Pathway
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The term is larger to detail a Ortemational
	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Restrictions: Handling	
Handling	For Research Use only
Handling Concentration:	For Research Use only 50 μg/mL
Handling Concentration: Buffer:	For Research Use only 50 μg/mL 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
