Target Details

Target:	ERMAP
Alternative Name:	Ermap (ERMAP Products)
Background:	The protein encoded by this gene is a cell surface transmembrane protein that may act as an erythroid cell receptor, possibly as a mediator of cell adhesion. Polymorphisms in this gene are responsible for the Scianna/Radin blood group system. Two transcript variants encoding the same protein have been found for this gene.

Target Details

Molecular Weight:	49.5 kDa
NCBI Accession:	NP_061008

Application Details

Application Notes:	Recombinant human proteins can be used for: Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays
