antibodies

Datasheet for ABIN2720564 ESRRG Protein (Transcript Variant 3) (Myc-DYKDDDDK Tag)

1 Image

Overview

Quantity:	20 µg
Target:	ESRRG
Protein Characteristics:	Transcript Variant 3
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This ESRRG protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human Estrogen-related receptor gamma (transcript variant 3) protein expressed in HEK293 cells.
	Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	ESRRG

Alternative Name:	Estrogen-Related Receptor gamma (ESRRG Products)
Background:	This gene encodes a member of the estrogen receptor-related receptor (ESRR) family, which
	belongs to the nuclear hormone receptor superfamily. All members of the ESRR family share an
	almost identical DNA binding domain, which is composed of two C4-type zinc finger motifs.

	The ESRR members are orphan nuclear receptors they bind to the estrogen response element
	and steroidogenic factor 1 response element, and activate genes controlled by both response
	elements in the absence of any ligands. The ESRR family is closely related to the estrogen
	receptor (ER) family. They share target genes, co-regulators and promoters, and by targeting
	the same set of genes, the ESRRs seem to interfere with the ER-mediated estrogen response in
	various ways. It has been reported that the family member encoded by this gene functions as a
	transcriptional activator of DNA cytosine-5-methyltransferases 1 (Dnmt1) expression by direct
	binding to its response elements in the DNMT1 promoters, modulates cell proliferation and
	estrogen signaling in breast cancer, and negatively regulates bone morphogenetic protein 2-
	induced osteoblast differentiation and bone formation. Multiple alternatively spliced transcript
	variants have been identified, which mainly differ at the 5' end and some of which encode
	protein isoforms differing in the N-terminal region.
Molecular Weight:	48.4 kDa
NCBI Accession:	NP_996318
Pathways:	Nuclear Receptor Transcription Pathway, Retinoic Acid Receptor Signaling Pathway, Steroid

Hormone Mediated Signaling Pathway

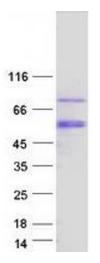

Application Details

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

Handling

Concentration:	50 µg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.
