

## Datasheet for ABIN2720592 **anti-MECOM antibody**

[Go to Product page](#)

### Overview

|              |                          |
|--------------|--------------------------|
| Quantity:    | 0.1 mg                   |
| Target:      | MECOM                    |
| Reactivity:  | Human                    |
| Host:        | Rabbit                   |
| Clonality:   | Polyclonal               |
| Application: | Enzyme Immunoassay (EIA) |

### Product Details

|               |                                                                                                                                                    |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| Isotype:      | IgG                                                                                                                                                |
| Purification: | The fragment used for D immunization was expressed in E.coli and the purified protein fragment was used for affinity purification of the antibody. |

### Target Details

|                   |                                         |
|-------------------|-----------------------------------------|
| Target:           | MECOM                                   |
| Alternative Name: | Evi1 ( <a href="#">MECOM Products</a> ) |

### Application Details

|                    |                                                                    |
|--------------------|--------------------------------------------------------------------|
| Application Notes: | Optimal working dilution should be determined by the investigator. |
| Restrictions:      | For Research Use only                                              |
