Target Details

Target:	FAM136A
Alternative Name:	Fam136a (FAM136A Products)
Background:	<p>This gene encodes a mitochondrially localized protein that is highly conserved across species. The gene is expressed in a variety of tissues including human lymphoblast cells and rat neurosensory epithelium of the crista ampullaris. A mutation in this gene has been associated with familial Meniere's disease, a chronic disorder of the inner ear. Several pseudogenes of this gene are found on other chromosomes. Alternative splicing results in multiple transcript</p>
