antibodies

Datasheet for ABIN2721214 FKBP4 Protein (Myc-DYKDDDDK Tag)

Image

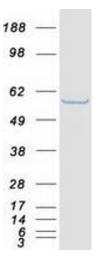

Overview

Quantity:	20 µg
Target:	FKBP4
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This FKBP4 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	Recombinant human FKBP4 protein expressed in HEK293 cells.Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	FKBP4
Alternative Name:	Fkbp4 (FKBP4 Products)
Background:	The protein encoded by this gene is a member of the immunophilin protein family, which play a role in immunoregulation and basic cellular processes involving protein folding and trafficking. This encoded protein is a cis-trans prolyl isomerase that binds to the immunosuppressants FK506 and rapamycin. It has high structural and functional similarity to FK506-binding protein 1A (FKBP1A), but unlike FKBP1A, this protein does not have immunosuppressant activity when

	complexed with FK506. It interacts with interferon regulatory factor-4 and plays an important
	role in immunoregulatory gene expression in B and T lymphocytes. This encoded protein is
	known to associate with phytanoyl-CoA alpha-hydroxylase. It can also associate with two heat
	shock proteins (hsp90 and hsp70) and thus may play a role in the intracellular trafficking of
	hetero-oligomeric forms of the steroid hormone receptors. This protein correlates strongly with
	adeno-associated virus type 2 vectors (AAV) resulting in a significant increase in AAV-mediated
	transgene expression in human cell lines. Thus this encoded protein is thought to have
	important implications for the optimal use of AAV vectors in human gene therapy. The human
	genome contains several non-transcribed pseudogenes similar to this gene.
Molecular Weight:	51.6 kDa
NCBI Accession:	NP_002005
Pathways:	Intracellular Steroid Hormone Receptor Signaling Pathway
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
