Target Details

Target:	FKBPL
Alternative Name:	Fkbp1 (FKBPL Products)
Background:	<p>The protein encoded by this gene has similarity to the immunophilin protein family, which play a role in immunoregulation and basic cellular processes involving protein folding and trafficking.</p> <p>The encoded protein is thought to have a potential role in the induced radioresistance. Also it appears to have some involvement in the control of the cell cycle.</p>
