## Target Details

Target:	FLRT3
Alternative Name:	Flrt3 ( <a href="#">FLRT3 Products</a> )
Background:	This gene encodes a member of the fibronectin leucine rich transmembrane protein (FLRT) family. FLRTs may function in cell adhesion and/or receptor signalling. Their protein structures resemble small leucine-rich proteoglycans found in the extracellular matrix. This gene is expressed in many tissues. Two alternatively spliced transcript variants encoding the same
