## Target Details

Target:	FOXD4L1
Alternative Name:	Foxd4-Like 1 ( <a href="#">FOXD4L1 Products</a> )
Background:	This gene is a member of the forkhead/winged-helix (FOX) family of transcription factors with highly conserved FOX DNA-binding domains. Members of the FOX family of transcription factors are regulators of embryogenesis and may play a role in human cancer. This gene lies in a region of chromosome 2 that surrounds the site where two ancestral chromosomes fused to form human chromosome 2. This region is duplicated elsewhere in the human genome,

## Target Details

	primarily in subtelomeric and pericentromeric locations, thus mutiple copies of this gene have been found.
