## Product Details

Characteristics:	<ul style="list-style-type: none"><li>• Recombinant human GOPC / PIST (transcript variant 1) protein expressed in HEK293 cells.</li><li>• Produced with end-sequenced ORF clone</li></ul>
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining

## Target Details

Target:	GOPC
Alternative Name:	Gopc,pist ( <a href="#">GOPC Products</a> )
Background:	This gene encodes a Golgi protein with a PDZ domain. The PDZ domain is globular and proteins which contain them bind other proteins through short motifs near the C-termini. Mice which are deficient in the orthologous protein have globozoospermia and are infertile. Multiple transcript variants encoding different isoforms have been found for this gene.

## Target Details

Molecular Weight:	50.3 kDa

Pathways:	<a href="#">Maintenance of Protein Location</a> , <a href="#">Asymmetric Protein Localization</a>

## Application Details

Application Notes:	Recombinant human proteins can be used for: Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
