

Datasheet for ABIN2722265
GSKIP Protein (Myc-DYKDDDDK Tag)

[Go to Product page](#)

1 Image

Overview

Quantity:	20 µg
Target:	GSKIP
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This GSKIP protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)

Product Details

Characteristics:	<ul style="list-style-type: none">• Recombinant human GSKIP protein expressed in HEK293 cells.• Produced with end-sequenced ORF clone
------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------

Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
---------	--------------------------------------------------------------

Target Details

Target:	GSKIP
Alternative Name:	Gskip (GSKIP Products)
Background:	This gene encodes a protein that is involved as a negative regulator of GSK3-beta in the Wnt signaling pathway. The encoded protein may play a role in the retinoic acid signaling pathway by regulating the functional interactions between GSK3-beta, beta-catenin and cyclin D1, and it regulates the beta-catenin/N-cadherin pool. The encoded protein contains a GSK3-beta interacting domain (GID) in its C-terminus, which is similar to the GID of Axin. The protein also

Target Details

contains an evolutionarily conserved RII-binding domain, which facilitates binding with protein kinase-A and GSK3-beta, enabling its role as an A-kinase anchoring protein. Alternatively spliced transcript variants have been observed for this gene.

Molecular Weight: 15.5 kDa

NCBI Accession: [NP_057556](#)

Application Details

Application Notes: Recombinant human proteins can be used for:
Native antigens for optimized antibody production
Positive controls in ELISA and other antibody assays

Comment: The tag is located at the C-terminal.

Restrictions: For Research Use only

Handling

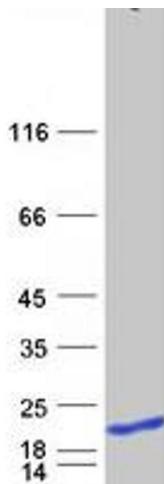

Concentration: 50 µg/mL

Buffer: 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.

Storage: -80 °C

Storage Comment: Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.
