## Datasheet for ABIN2722381 H2AFY Protein (Transcript Variant 2) (Myc-DYKDDDDK Tag)

Overview

Image

Quantity:	20 µg
Target:	H2AFY
Protein Characteristics:	Transcript Variant 2
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This H2AFY protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	<ul> <li>Recombinant human H2AFY / MACROH2A1 (transcript variant 2) protein expressed in HEK293 cells.</li> </ul>
	Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining

## Target Details

Target:	H2AFY
Alternative Name:	h2afy,macroh2a1 (H2AFY Products)
Background:	Histones are basic nuclear proteins that are responsible for the nucleosome structure of the chromosomal fiber in eukaryotes. Nucleosomes consist of approximately 146 bp of DNA
	wrapped around a histone octamer composed of pairs of each of the four core histones (H2A,

## Target Details

	H2B, H3, and H4). The chromatin fiber is further compacted through the interaction of a linker histone, H1, with the DNA between the nucleosomes to form higher order chromatin structures. This gene encodes a replication-independent histone that is a member of the histone H2A family. It replaces conventional H2A histones in a subset of nucleosomes where it represses transcription and participates in stable X chromosome inactivation. Alternative splicing results in multiple transcript variants encoding different isoforms.
Molecular Weight:	39.3 kDa
NCBI Accession:	NP_004884
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays
Comment:	
Comment: Restrictions:	Positive controls in ELISA and other antibody assays
	Positive controls in ELISA and other antibody assays The tag is located at the C-terminal.
Restrictions:	Positive controls in ELISA and other antibody assays The tag is located at the C-terminal.

Storage Comment:

-80 °C

Storage:

Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting

Image 1. Validation with Western Blot
