| Alternative Name:             | Homer2 (HOMER2 Products)  |
| Background:                   | This gene encodes a member of the homer family of dendritic proteins. Members of this family regulate group 1 metabotrophic glutamate receptor function. The encoded protein is a postsynaptic density scaffolding protein. Alternative splicing results in multiple transcript |

variants. Two related pseudogenes have been identified on chromosome 14.
