Overview

Alternative Name:

Background:

IDE Protein (Transcript Variant 1) (His tag)

Overview	
Quantity:	10 μg
Target:	IDE
Protein Characteristics:	Transcript Variant 1
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This IDE protein is labelled with His tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	Recombinant human Insulin-degrading enzyme (transcript variant 1) protein expressed in HEK293 cells.
	Produced with end-sequenced ORF clone
Purity:	> 95 % as determined by SDS-PAGE and Coomassie blue staining
Endotoxin Level:	Endotoxin level is <0.1 ng/μg of protein (<1EU/μg).
Target Details	
Target:	IDE

This gene encodes a zinc metallopeptidase that degrades intracellular insulin, and thereby

terminates insulins activity, as well as participating in intercellular peptide signalling by

Insulin-Degrading Enzyme (IDE Products)

degrading diverse peptides such as glucagon, amylin, bradykinin, and kallidin. The preferential affinity of this enzyme for insulin results in insulin-mediated inhibition of the degradation of other peptides such as beta-amyloid. Deficiencies in this protein's function are associated with Alzheimer's disease and type 2 diabetes mellitus but mutations in this gene have not been shown to be causitive for these diseases. This protein localizes primarily to the cytoplasm but in some cell types localizes to the extracellular space, cell membrane, peroxisome, and mitochondrion. Alternative splicing results in multiple transcript variants encoding distinct isoforms. Additional transcript variants have been described but have not been experimentally verified.[provided by RefSeq, Sep 2009].

Molecular Weight:	41.27kD
NCBI Accession:	NP_004960
Pathways:	SARS-CoV-2 Protein Interactome

Application Details

Application Notes:	Recombinant numan proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

Handling

Buffer:	Supplied as a 0.2 μ M filtered solution of 20 mM PB,150 mM NaCl, pH 7.4
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.
