| Overview                      |                                                                                                                                                                                                                                                                                        |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Quantity:                     | 20 μg                                                                                                                                                                                                                                                                                  |
| Target:                       | IRF5                                                                                                                                                                                                                                                                                   |
| Protein Characteristics:      | Transcript Variant 3                                                                                                                                                                                                                                                                   |
| Origin:                       | Human                                                                                                                                                                                                                                                                                  |
| Source:                       | HEK-293 Cells                                                                                                                                                                                                                                                                          |
| Protein Type:                 | Recombinant                                                                                                                                                                                                                                                                            |
| Purification tag / Conjugate: | This IRF5 protein is labelled with Myc-DYKDDDDK Tag.                                                                                                                                                                                                                                   |
| Application:                  | Antibody Production (AbP), Standard (STD)                                                                                                                                                                                                                                              |
| Product Details               |                                                                                                                                                                                                                                                                                        |
| Characteristics:              | <ul> <li>Recombinant human IRF5 (transcript variant 3) protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul>                                                                                                                                    |
| Purity:                       | > 80 % as determined by SDS-PAGE and Coomassie blue staining                                                                                                                                                                                                                           |
| Target Details                |                                                                                                                                                                                                                                                                                        |
| Target:                       | IRF5                                                                                                                                                                                                                                                                                   |
| Alternative Name:             | Irf5 (IRF5 Products)                                                                                                                                                                                                                                                                   |
| Background:                   | This gene encodes a member of the interferon regulatory factor (IRF) family, a group of transcription factors with diverse roles, including virus-mediated activation of interferon, and modulation of cell growth, differentiation, apoptosis, and immune system activity. Members of |

the IRF family are characterized by a conserved N-terminal DNA-binding domain containing

#### **Target Details**

|                   | tryptophan (W) repeats. Alternative promoter use and alternative splicing result in multiple transcript variants, and a 30-nt indel polymorphism (SNP rs60344245) can result in loss of a 10-aa segment. |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Molecular Weight: | 55.9 kDa                                                                                                                                                                                                 |
| NCBI Accession:   | NP_001092097                                                                                                                                                                                             |
| Pathways:         | TLR Signaling, Autophagy                                                                                                                                                                                 |

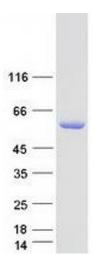

## **Application Details**

| Application Notes: | Recombinant human proteins can be used for:          |
|--------------------|------------------------------------------------------|
|                    | Native antigens for optimized antibody production    |
|                    | Positive controls in ELISA and other antibody assays |
| Comment:           | The tag is located at the C-terminal.                |
| Restrictions:      | For Research Use only                                |

### Handling

| Concentration:   | 50 μg/mL                                                                                                                                          |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| Buffer:          | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.                                                                                            |
| Storage:         | -80 °C                                                                                                                                            |
| Storage Comment: | Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended. |
