Datasheet for ABIN2723847 Isocitrate Dehydrogenase Protein (IDH) (DYKDDDDK Tag)

Overview

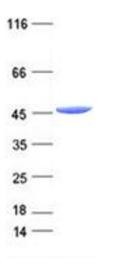

Image

Quantity:	20 µg
Target:	Isocitrate Dehydrogenase (IDH)
Origin:	Human
Source:	Insect cells (Sf9)
Protein Type:	Recombinant
Purification tag / Conjugate:	This Isocitrate Dehydrogenase protein is labelled with DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human Isocitrate dehydrogenase / IDH (C-term DDK tag) protein expressed in Sf9 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	Isocitrate Dehydrogenase (IDH)
Alternative Name:	Isocitrate Dehydrogenase,idh (IDH Products)
Background:	Isocitrate dehydrogenases catalyze the oxidative decarboxylation of isocitrate to 2- oxoglutarate. These enzymes belong to two distinct subclasses, one of which utilizes NAD(+) as the electron acceptor and the other NADP(+). Five isocitrate dehydrogenases have been reported: three NAD(+)-dependent isocitrate dehydrogenases, which localize to the

	mitochondrial matrix, and two NADP(+)-dependent isocitrate dehydrogenases, one of which is
	mitochondrial and the other predominantly cytosolic. Each NADP(+)-dependent isozyme is a
	homodimer. The protein encoded by this gene is the NADP(+)-dependent isocitrate
	dehydrogenase found in the cytoplasm and peroxisomes. It contains the PTS-1 peroxisomal
	targeting signal sequence. The presence of this enzyme in peroxisomes suggests roles in the
	regeneration of NADPH for intraperoxisomal reductions, such as the conversion of 2, 4-dienoyl-
	CoAs to 3-enoyl-CoAs, as well as in peroxisomal reactions that consume 2-oxoglutarate,
	namely the alpha-hydroxylation of phytanic acid. The cytoplasmic enzyme serves a significant
	role in cytoplasmic NADPH production. Alternatively spliced transcript variants encoding the
	same protein have been found for this gene.
Molecular Weight:	47 kDa
NCBI Accession:	NP_005887
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 μg/mL
Buffer:	50 mM Tris-HCl pH 8.0, 150 mM NaCl, 10 % glycerol. Store at -80C. Avoid repeated freeze-thaw
	cycles. Stable for at least 3 months from receipt of products under proper storage and handling
	conditions.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.
