IDH3A Protein (Myc-DYKDDDDK Tag)

Overview

Go to	D		
	Pron	ויאווו	DAGE

Quantity:	20 μg
Target:	IDH3A
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This IDH3A protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	

Product Details

Characteristics:	 Recombinant human Isocitric dehydrogenase alpha / IDH3A protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining

Target Details

Target:	IDH3A	
Alternative Name:	Isocitric Dehydrogenase Alpha,idh3a (IDH3A Products)	
Background:	Isocitrate dehydrogenases catalyze the oxidative decarboxylation of isocitrate to 2-	
	oxoglutarate. These enzymes belong to two distinct subclasses, one of which utilizes NAD(+)	
	as the electron acceptor and the other NADP(+). Five isocitrate dehydrogenases have been	
	reported: three NAD(+)-dependent isocitrate dehydrogenases, which localize to the	

Target Details

mitochondrial matrix, and two NADP(+)-dependent isocitrate dehydrogenases, one of which is mitochondrial and the other predominantly cytosolic. NAD(+)-dependent isocitrate dehydrogenases catalyze the allosterically regulated rate-limiting step of the tricarboxylic acid cycle. Each isozyme is a heterotetramer that is composed of two alpha subunits, one beta subunit, and one gamma subunit. The protein encoded by this gene is the alpha subunit of one isozyme of NAD(+)-dependent isocitrate dehydrogenase.

Molecular Weight:

36.6 kDa

NCBI Accession:

NP_005521

Application Details

Application Notes:

Recombinant human proteins can be used for:

Native antigens for optimized antibody production

Positive controls in ELISA and other antibody assays

Comment:

The tag is located at the C-terminal.

Restrictions:

For Research Use only

Handling

COL	ıcer	ııra	uon:

50 μg/mL

Buffer:

25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.

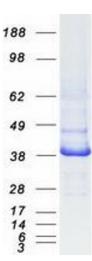

Storage:

-80 °C

Storage Comment:

Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze

immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
