KCNJ6 Protein (Myc-DYKDDDDK Tag)

Overview

Image

Go to	Prod	luct	page

Quantity:	20 μg
Target:	KCNJ6
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant

Purification tag / Conjugate: This KCNJ6 protein is labelled with Myc-DYKDDDDK Tag.

Application: Antibody Production (AbP), Standard (STD)

Product Details

Characteristics:
Recombinant human KCNJ6 protein expressed in HEK293 cells.
Produced with end-sequenced ORF clone

Purity: > 80 % as determined by SDS-PAGE and Coomassie blue staining

Target Details

Target:	KCNJ6
Alternative Name:	Kcnj6 (KCNJ6 Products)
Background:	This potassium channel may be involved in the regulation of insulin secretion by glucose and/or neurotransmitters acting through G-protein-coupled receptors. Inward rectifier potassium
	channels are characterized by a greater tendency to allow potassium to flow into the cell rather
	than out of it. Their voltage dependence is regulated by the concentration of extracellular
	potassium as external potassium is raised, the voltage range of the channel opening shifts to

Target Details

	more positive voltages. The inward rectification is mainly due to the blockage of outward current by internal magnesium. [UniProtKB/Swiss-Prot Function]
Molecular Weight:	48.3 kDa
NCBI Accession:	NP_002231

Application Details

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

Handling

Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.
