Target Details	
Target:	MAGEA4
Alternative Name:	Mage-4 (MAGEA4 Products)
Background:	This gene is a member of the MAGEA gene family. The members of this family encode proteins

with 50 to 80 % sequence identity to each other. The promoters and first exons of the MAGEA

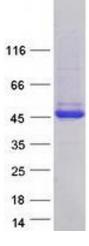

genes show considerable variability, suggesting that the existence of this gene family enables

the same function to be expressed under different transcriptional controls. The MAGEA genes
