Overview		
Quantity:	20 μg	
Target:	MAP2K3	
Protein Characteristics:	Transcript Variant A	
Origin:	Human	
Source:	HEK-293 Cells	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This MAP2K3 protein is labelled with Myc-DYKDDDDK Tag.	
Application:	Antibody Production (AbP), Standard (STD)	
Product Details		
Characteristics:	<ul> <li>Recombinant human MAP2K3 (transcript variant A) protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul>	
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining	
Target Details		
Target:	MAP2K3	
Alternative Name:	Map2k3 (MAP2K3 Products)	
Background:	The protein encoded by this gene is a dual specificity protein kinase that belongs to the MAP kinase kinase family. This kinase is activated by mitogenic and environmental stress, and participates in the MAP kinase-mediated signaling cascade. It phosphorylates and thus	

activates MAPK14/p38-MAPK. This kinase can be activated by insulin, and is necessary for the

	expression of glucose transporter. Expression of RAS oncogene is found to result in the		
	accumulation of the active form of this kinase, which thus leads to the constitutive activation of		
	MAPK14, and confers oncogenic transformation of primary cells. The inhibition of this kinase is		
	involved in the pathogenesis of Yersina pseudotuberculosis. Multiple alternatively spliced		
	transcript variants that encode distinct isoforms have been reported for this gene.		
Molecular Weight:	36 kDa		
NCBI Accession:	NP_002747		
Pathways:	MAPK Signaling, TLR Signaling, Activation of Innate immune Response, Toll-Like Receptors		
	Cascades, Autophagy, Signaling Events mediated by VEGFR1 and VEGFR2		
Application Details			
Application Notes:	Recombinant human proteins can be used for:		
	Native antigens for optimized antibody production		
	Positive controls in ELISA and other antibody assays		
Comment:	The tag is located at the C-terminal.		
Restrictions:	For Research Use only		
Handling			
Concentration:	50 μg/mL		
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.		
Storage:	-80 °C		
Storage Comment:	Comment: Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.		

## **Western Blotting**
