MEK2 Protein (Myc-DYKDDDDK Tag)

Image

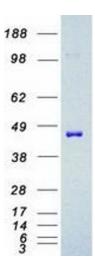

$\overline{}$			
()	V/P	r\/I	ΘM

Overview		
Quantity:	20 μg	
Target:	MEK2 (MAP2K2)	
Origin:	Human	
Source:	HEK-293 Cells	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This MEK2 protein is labelled with Myc-DYKDDDDK Tag.	
Application:	Antibody Production (AbP), Standard (STD)	
Product Details		
Characteristics:	 Recombinant human MAPKK 2 protein expressed in HEK293 cells. Produced with end-sequenced ORF clone 	
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining	
Target Details		
Target:	MEK2 (MAP2K2)	
Alternative Name:	Mapkk 2 (MAP2K2 Products)	
Background:	The protein encoded by this gene is a dual specificity protein kinase that belongs to the MAP	
	kinase kinase family. This kinase is known to play a critical role in mitogen growth factor signal	
	transduction. It phosphorylates and thus activates MAPK1/ERK2 and MAPK2/ERK3. The	
	activation of this kinase itself is dependent on the Ser/Thr phosphorylation by MAP kinase	
	kinase kinases. Mutations in this gene cause cardiofaciocutaneous syndrome (CFC syndrome),	

Target Details

	a disease characterized by heart defects, mental retardation, and distinctive facial features similar to those found in Noonan syndrome. The inhibition or degradation of this kinase is also found to be involved in the pathogenesis of Yersinia and anthrax. A pseudogene, which is located on chromosome 7, has been identified for this gene.	
Molecular Weight:	44.2 kDa	
NCBI Accession:	NP_109587	
Pathways:	MAPK Signaling, RTK Signaling, Fc-epsilon Receptor Signaling Pathway, Neurotrophin Signaling Pathway, Activation of Innate immune Response, Toll-Like Receptors Cascades, Signaling of Hepatocyte Growth Factor Receptor, BCR Signaling	
Application Details		
Application Notes:	Recombinant human proteins can be used for: Native antigens for optimized antibody production Positive controls in ELISA and other antibody assays	
Comment:	The tag is located at the C-terminal.	
Restrictions:	For Research Use only	
Handling		
Concentration:	50 μg/mL	
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.	

Western Blotting
