Target Details

Target:	MBNL2
Alternative Name:	Mbnl2 (MBNL2 Products)
Background:	This gene is a member of the muscleblind protein family which was initially described in <i>Drosophila melanogaster</i> . This gene encodes a C3H-type zinc finger protein that modulates alternative splicing of pre-mRNAs. Muscleblind proteins bind specifically to expanded dsCUG RNA but not to normal size CUG repeats and may thereby play a role in the pathophysiology of
