Datasheet for ABIN2726004 MID1 Protein (Transcript Variant 1) (Myc-DYKDDDDK Tag)

Overview

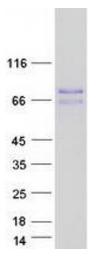

Image

Overview	
Quantity:	20 µg
Target:	MID1
Protein Characteristics:	Transcript Variant 1
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This MID1 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human Midline-1 (transcript variant 1) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	MID1
Alternative Name:	Midline-1 (MID1 Products)
Background:	The protein encoded by this gene is a member of the tripartite motif (TRIM) family, also known as the &aposRING-B box-coiled coil' (RBCC) subgroup of RING finger proteins. The TRIM motif includes three zinc-binding domains, a RING, a B-box type 1 and a B-box type 2, and a coiled-coil region. This protein forms homodimers which associate with microtubules in the

Target Details

	cytoplasm. The protein is likely involved in the formation of multiprotein structures acting as
	anchor points to microtubules. Mutations in this gene have been associated with the X-linked
	form of Opitz syndrome, which is characterized by midline abnormalities such as cleft lip,
	laryngeal cleft, heart defects, hypospadias, and agenesis of the corpus callosum. This gene was
	also the first example of a gene subject to X inactivation in human while escaping it in mouse.
	Alternative promoter use, alternative splicing and alternative polyadenylation result in multiple
	transcript variants that have different tissue specificities.
Molecular Weight:	75.1 kDa
NCBI Accession:	NP_000372
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 µg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
