# MPST Protein (Transcript Variant 1) (Myc-DYKDDDDK Tag)

Image

Go to Product page

U	V	е	r۱	/	e	V	/

Quantity:	20 μg
Target:	MPST
Protein Characteristics:	Transcript Variant 1
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This MPST protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	<ul> <li>Recombinant human MPST (transcript variant 1) protein expressed in HEK293 cells.</li> <li>Produced with end-sequenced ORF clone</li> </ul>
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	MPST
Alternative Name:	Mpst (MPST Products)
Background:	This protein encoded by this gene catalyzes the transfer of a sulfur ion from 3-
	mercaptopyruvate to cyanide or other thiol compounds. It may be involved in cysteine
	degradation and cyanide detoxification. There is confusion in literature between this protein
	(mercaptopyruvate sulfurtransferase, MPST), which appears to be cytoplasmic, and thiosulfate

#### **Target Details**

sulfurtransferase (rhodanese, TST, GeneID:7263), which is a mitochondrial protein. Deficiency
in MPST activity has been implicated in a rare inheritable disorder known as mercaptolactate-
cysteine disulfiduria (MCDU). Alternatively spliced transcript variants encoding same or
different isoforms have been identified for this gene.

Molecular Weight: 35.1 kDa

NCBI Accession: NP\_066949

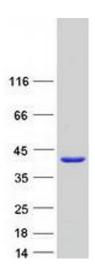

## **Application Details**

Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only

## Handling

Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.
