Datasheet for ABIN2726310 MPZL2 Protein (Transcript Variant 2) (Myc-DYKDDDDK Tag)

Overview

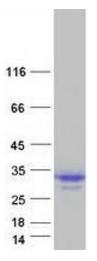

Image

Overview	
Quantity:	20 µg
Target:	MPZL2
Protein Characteristics:	Transcript Variant 2
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This MPZL2 protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human MPZL2 (transcript variant 2) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	MPZL2
Alternative Name:	Mpzl2 (MPZL2 Products)
Background:	Thymus development depends on a complex series of interactions between thymocytes and the stromal component of the organ. Epithelial V-like antigen (EVA) is expressed in thymus epithelium and strongly downregulated by thymocyte developmental progression. This gene is expressed in the thymus and in several epithelial structures early in embryogenesis. It is highly

Target Details

	homologous to the myelin protein zero and, in thymus-derived epithelial cell lines, is poorly
	soluble in nonionic detergents, strongly suggesting an association to the cytoskeleton. Its
	capacity to mediate cell adhesion through a homophilic interaction and its selective regulation
	by T cell maturation might imply the participation of EVA in the earliest phases of thymus
	organogenesis. The protein bears a characteristic V-type domain and two potential N-
	glycosylation sites in the extracellular domain a putative serine phosphorylation site for casein
	kinase 2 is also present in the cytoplasmic tail. Two transcript variants encoding the same
	protein have been found for this gene.
Molecular Weight:	21.7 kDa
NCBI Accession:	NP_658911
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting

Image 1. Validation with Western Blot
