#### Target Details

Target:	MRI1 (Mri1)
Alternative Name:	Mri1 ( <a href="#">Mri1 Products</a> )
Background:	This enzyme functions in the methionine salvage pathway by catalyzing the interconversion of methylthioribose-1-phosphate and methylthioribulose-1-phosphate. Elevated expression of the encoded protein is associated with metastatic melanoma and this protein promotes melanoma cell invasion independent of its enzymatic activity. Mutations in this gene may be associated
