Datasheet for ABIN2726384
MRPS25 Protein (Myc-DYKDDDDK Tag)
1 Image

## Overview

| Quantity: | $20 \mu \mathrm{~g}$ |
| :--- | :--- |
| Target: | MRPS25 |
| Origin: | Human |
| Source: | HEK-293 Cells |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This MRPS25 protein is labelled with Myc-DYKDDDDK Tag. |
| Application: | Antibody Production (AbP), Standard (STD) |

Product Details

Characteristics:

- Recombinant human MRPS25 protein expressed in HEK293 cells.
- Produced with end-sequenced ORF clone

Purity: $\quad>80 \%$ as determined by SDS-PAGE and Coomassie blue staining

Target Details

| Target: | MRPS25 |
| :--- | :--- |
| Alternative Name: | Mrps25 (MRPS25 Products) |
| Background: | Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein |
|  | synthesis within the mitochondrion. Mitochondrial ribosomes (mitoribosomes) consist of a |
|  | small 28S subunit and a large 39S subunit. They have an estimated $75 \%$ protein to rRNA |
|  | composition compared to prokaryotic ribosomes, where this ratio is reversed. Another |
|  | difference between mammalian mitoribosomes and prokaryotic ribosomes is that the latter |

## Target Details

|  | contain a 5 S rRNA. Among different species, the proteins comprising the mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which prevents easy recognition by sequence homology. This gene encodes a 28 S subunit protein. A pseudogene corresponding to this gene is found on chromosome 4. Alternative splicing results in multiple transcript variants. |
| :---: | :---: |
| Molecular Weight: | 19.9 kDa |
| NCBI Accession: | NP_071942 |
| Pathways: | SARS-CoV-2 Protein Interactome |
| Application Details |  |
| Application Notes: | Recombinant human proteins can be used for: <br> Native antigens for optimized antibody production <br> Positive controls in ELISA and other antibody assays |
| Comment: | The tag is located at the C-terminal. |
| Restrictions: | For Research Use only |
| Handling |  |
| Concentration: | $50 \mu \mathrm{~g} / \mathrm{mL}$ |
| Buffer: | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 \% glycerol. |
| Storage: | $-80^{\circ} \mathrm{C}$ |
| Storage Comment: | Store at $-80^{\circ} \mathrm{C}$. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended. |

## Western Blotting
