## Target Details

Target:	MS4A7
Alternative Name:	Ms4a7 ( <a href="#">MS4A7 Products</a> )
Background:	This gene encodes a member of the membrane-spanning 4A gene family, members of which are characterized by common structural features and similar intron/exon splice boundaries and display unique expression patterns in hematopoietic cells and nonlymphoid tissues. This family member is associated with mature cellular function in the monocytic lineage, and it may be a
