## Datasheet for ABIN2726640 MBP Protein (Transcript Variant 4) (Myc-DYKDDDDK Tag)

Overview

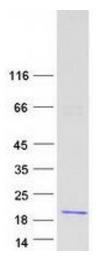

Image

Quantity:	20 µg
Target:	MBP
Protein Characteristics:	Transcript Variant 4
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This MBP protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	Recombinant human Myelin Basic Protein (transcript variant 4) protein expressed in HEK293 cells.
	Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	

Target:	MBP
Alternative Name:	Myelin Basic Protein (MBP Products)
Background:	The protein encoded by the classic MBP gene is a major constituent of the myelin sheath of oligodendrocytes and Schwann cells in the nervous system. However, MBP-related transcripts
	are also present in the bone marrow and the immune system. These mRNAs arise from the

	long MBP gene (otherwise called 'Golli-MBP') that contains 3 additional exons located upstream
	of the classic MBP exons. Alternative splicing from the Golli and the MBP transcription start
	sites gives rise to 2 sets of MBP-related transcripts and gene products. The Golli mRNAs
	contain 3 exons unique to Golli-MBP, spliced in-frame to 1 or more MBP exons. They encode
	hybrid proteins that have N-terminal Golli aa sequence linked to MBP aa sequence. The second
	family of transcripts contain only MBP exons and produce the well characterized myelin basic
	proteins. This complex gene structure is conserved among species suggesting that the MBP
	transcription unit is an integral part of the Golli transcription unit and that this arrangement is
	important for the function and/or regulation of these genes.
Molecular Weight:	17.2 kDa
NCBI Accession:	NP_001020263
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 μg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
