Datasheet for ABIN2726683 MYLK Protein (Transcript Variant 7) (Myc-DYKDDDDK Tag)

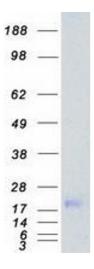

Image

Overview	
Quantity:	20 µg
Target:	MYLK
Protein Characteristics:	Transcript Variant 7
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This MYLK protein is labelled with Myc-DYKDDDDK Tag.
Application:	Antibody Production (AbP), Standard (STD)
Product Details	
Characteristics:	 Recombinant human MYLK (transcript variant 7) protein expressed in HEK293 cells. Produced with end-sequenced ORF clone
Purity:	> 80 % as determined by SDS-PAGE and Coomassie blue staining
Target Details	
Target:	MYLK
Alternative Name:	Mylk (MYLK Products)
Background:	This gene, a muscle member of the immunoglobulin gene superfamily, encodes myosin light chain kinase which is a calcium/calmodulin dependent enzyme. This kinase phosphorylates myosin regulatory light chains to facilitate myosin interaction with actin filaments to produce contractile activity. This gene encodes both smooth muscle and nonmuscle isoforms. In

Target Details

	addition, using a separate promoter in an intron in the 3' region, it encodes telokin, a small
	protein identical in sequence to the C-terminus of myosin light chain kinase, that is
	independently expressed in smooth muscle and functions to stabilize unphosphorylated
	myosin filaments. A pseudogene is located on the p arm of chromosome 3. Four transcript
	variants that produce four isoforms of the calcium/calmodulin dependent enzyme have been
	identified as well as two transcripts that produce two isoforms of telokin. Additional variants
	have been identified but lack full length transcripts.
Molecular Weight:	16.7 kDa
NCBI Accession:	NP_444259
Application Details	
Application Notes:	Recombinant human proteins can be used for:
	Native antigens for optimized antibody production
	Positive controls in ELISA and other antibody assays
Comment:	The tag is located at the C-terminal.
Restrictions:	For Research Use only
Handling	
Concentration:	50 µg/mL
Buffer:	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.
Storage:	-80 °C
Storage Comment:	Store at -80°C. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze
	immediately. Only 2-3 freeze thaw cycles are recommended.

Western Blotting
