Datasheet for ABIN2726835
NACA Protein (Transcript Variant 3) (Myc-DYKDDDDK Tag)
1 Image

## Overview

| Quantity: | $20 \mu \mathrm{~g}$ |
| :--- | :--- |
| Target: | NACA (NACa1) |
| Protein Characteristics: | Transcript Variant 3 |
| Origin: | Human |
| Source: | HEK-293 Cells |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This NACA protein is labelled with Myc-DYKDDDDK Tag. |
| Application: | Antibody Production (AbP), Standard (STD) |

## Product Details

## Characteristics:

- Recombinant human Nascent polypeptide-associated complex alpha subunit (NACA), transcript variant 3 (transcript variant 3) protein expressed in HEK293 cells.
- Produced with end-sequenced ORF clone

Purity: $\quad>80 \%$ as determined by SDS-PAGE and Coomassie blue staining

Target Details

| Target: | NACA (NACa1) |
| :--- | :--- |
| Alternative Name: | Nascent Polypeptide-Associated Complex alpha Subunit (Naca) (NACa1 Products) |
| Background: | This gene encodes a protein that associates with basic transcription factor 3 (BTF3) to form <br> the nascent polypeptide-associated complex (NAC). This complex binds to nascent proteins <br> that lack a signal peptide motif as they emerge from the ribosome, blocking interaction with the |

## Target Details

|  | signal recognition particle (SRP) and preventing mistranslocation to the endoplasmic reticulum. This protein is an IgE autoantigen in atopic dermatitis patients. Alternative splicing results in multiple transcript variants, but the full length nature of some of these variants, including those encoding very large proteins, has not been determined. There are multiple pseudogenes of this gene on different chromosomes. |
| :---: | :---: |
| Molecular Weight: | 23.2 kDa |
| NCBI Accession: | NP_005585 |
| Pathways: | Regulation of Muscle Cell Differentiation, Skeletal Muscle Fiber Development |
| Application Details |  |
| Application Notes: | Recombinant human proteins can be used for: <br> Native antigens for optimized antibody production <br> Positive controls in ELISA and other antibody assays |
| Comment: | The tag is located at the C-terminal. |
| Restrictions: | For Research Use only |
| Handling |  |
| Concentration: | $50 \mu \mathrm{~g} / \mathrm{mL}$ |
| Buffer: | 25 mM Tris. $\mathrm{HCl}, \mathrm{pH} 7.3,100 \mathrm{mM}$ glycine, 10 \% glycerol. |
| Storage: | $-80^{\circ} \mathrm{C}$ |
| Storage Comment: | Store at $-80^{\circ} \mathrm{C}$. Thaw on ice, aliquot to individual single-use tubes, and then re-freeze immediately. Only 2-3 freeze thaw cycles are recommended. |

## Western Blotting
