## Target Details

Target:	NDC80
Alternative Name:	Ndc80 ( <a href="#">NDC80 Products</a> )
Background:	This gene encodes a component of the NDC80 kinetochore complex. The encoded protein consists of an N-terminal microtubule binding domain and a C-terminal coiled-coiled domain that interacts with other components of the complex. This protein functions to organize and stabilize microtubule-kinetochore interactions and is required for proper chromosome segregation.
